GSM Modem Installation

3. Plug GSM Modem into AC Power to Check Status

LED status light solid green after minute of flashing.
Call 1-702-221-1424 for more information on your
GSM modem's status.
Do NOT remove SIM card.

4. Connect GSM Modem to LED Sign

Attach 9-pin end of cable to LED sign. The cable will
only fit in one of the ports of the LED sign, the male port.
AC Power not required. Connect LED sign to power.

Important Notes:

**For best results, ensure antenna of GSM modem is pointing straight up.
Once configuration is complete, please call Jeremy at 702-221-1424 or email him
at jeremyg@tickercom.com and we will send an activation command.**

Your sign will remain blank until this command is sent.

All connections must stay complete at all times in order to receive feed.
